SPECIFICHE TECNICHE

Colorazioni

Le colorazioni degli specchi presentate, per limiti tecnici di stampa, sono indicative e non impegnative.

Ogni prodotto viene singolarmente sottoposto a specifici trattamenti per ottenere un manufatto che non può e non deve rispettare l'uniformità di un oggetto industriale, ma esprimere il meglio di una produzione artigianale. Nell'ambito della stessa lastra sono riscontrabili sfumature e tonalità di colore diverse.

Le lastre antichizzate della linea Specchi nel Tempo possono presentare leggere ossidazioni ed opacità che ne enfatizzano l'effetto tipico degli specchi antichi e non costituiscono difetti ma peculiarità per il raggiungimento dell'immagine "retro".

Messa in posa

Per la posa in opera è consigliato l'uso di colle o di siliconi neutri per specchi, tassativamente non acide/acetiche. Nella scelta del collante si consiglia di valutarne l'idoneità anche in base alla superficie di appoggio. Tutti i prodotti sono destinati ad uso interno. Si prendono in considerazione specifiche richieste "su misura" in particolare per progetti "contract".

TECHNICAL SPECIFICATIONS

Colors

The colors of the mirrors here presented, due to technical printing limits, are indicative and not binding.

Each product is individually subjected to specific treatments to obtain a product that cannot and must not respect the uniformity of an industrial object, but express the best of an handcrafted production. Within the same sheet there are different tones and shades of colour.

The antiqued sheets of the Specchi nel Tempo collection may have slight oxidations and opacities that emphasize the typical effect of antique mirrors and are not defects but peculiarities, achieving the "retro" image.

Installation

For the installation it is recommended to use neutral glues or silicones for mirrors, strictly non-acidic/non-acetic. When choosing the adhesive, it is advisable to evaluate its suitability also by taking into consideration the kind surface where the mirror will be installed. All products are intended for indoor use. Specific "tailor-made" requests are taken into consideration, in particular for "contract" projects.

MISURE

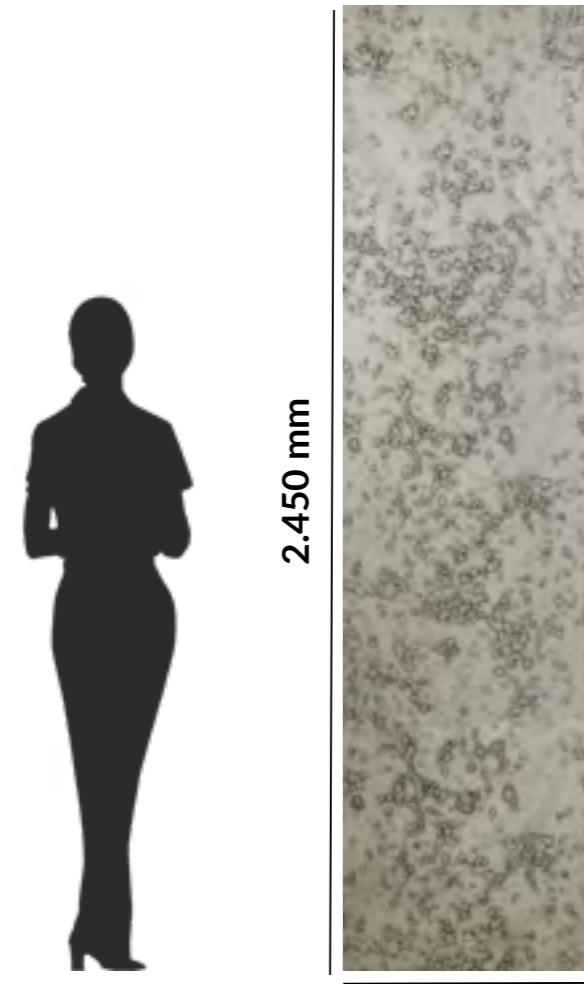

Le lastre hanno la dimensione massima di 1250x2450 mm, ulteriori e minori dimensioni possono essere richieste su misura.

SIZES

The sheets have a maximum size of 1250x2450 mm, additional and smaller dimensions can be made to measure.

2.450 mm

1.250 mm

LOGISTICA

Per l'imballo delle nostre lastre standard da 1250 x 2450 mm utilizziamo casse e pallet in legno di dimensione fissa. Il quantitativo minimo d'acquisto è di 8 lastre, anche in colorazioni miste.

Vi è la possibilità di ottenere anche una sola lastra, ma il ritiro deve avvenire per materiale sfuso quindi con apposito cavalletto per vetri.

La composizione delle casse complete varia in base allo spessore, in accordo con la tabella riportata nella pagina a fianco. I nostri imballi sono idonei sia al trasporto via mare che via aerea, in Europa ed all'estero grazie al trattamento FAO.

LOGISTICS

For the packaging of our standard 1250 x 2450 mm sheets, we use wooden crates and pallets of a fixed size. The minimum order quantity is 8 slabs, even in mixed colours.

There is the possibility of obtaining even a single sheet, but the pick up must take place for loose material, therefore with a special stand for glasses.

The composition of the complete cases varies according to the thickness, as shown in the label here. Our packaging is suitable for both sea and air transport, in Europe and abroad thanks to the FAO treatment.
